The 44th SCANDEFA invites you to experience the meeting of the Scandinavian dental market and sales partners from all over the world in springtime in wonderful Copenhagen.

**SCAND'EFA, organized by Bella Center, is being held in conjunction with the Annual Scientific Meeting, organized by the Danish Dental Association (www tandlaegeforeningen dk).**

**More than 500 exhibitors and 7,540 visitors participated at SCANDEFA 2010 on 14,220 m² of exhibition space.**

**Reservation of a booth Book online at www.scandefa.dk**

**Sales and Project Manager, Jo Jaqueline Ogihve sales@bellacenter dk, T +45 32 47 21 25**

**Travel information Bella Center is located just a 10 minute taxi ride from Copenhagen Airport. A regional train runs from the airport to Osted Station, only 15 minutes drive.**

**Book a hotel in Copenhagen www.visitcopenhagen.com/tours/plan_and_book**

**Welcome Reception Thursday, 26 August 2010, 18:30–20:00**

**The most popular feature of our World Congress is the Tabletop and Poster Presentation competition that occurs during the Welcome Reception in the Exhibit Hall on Thursday from 18:00-19:30. This competition provides the perfect forum for delegates to interact with colleagues in a social, yet instructive manner. Tabletop presentations should be kept to 5–7 minutes so that the presentation can be repeated in new observatories to review the case studies, etc. Poster presentations will be placed on bulletin boards at the start of the Congress and still remain on display throughout the Congress. Poster presentations should be at their positions to address questions during the Welcome Reception. All presentations will be judged, with the winners receiving awards and main podium consideration for future IC01 and DGO1 congresses.**

**Hotel information The site for this World Congress is the Ham burg Convention Center. The Congress is held in room blocks in the Radisson Hotel, adjacent to the Convention Center and at the Grand Elysee Hotel a five minute walk from the Convention Center. Special Congress rates at the Radisson are 165 Euros (about US$225) or at the Grand Elysee Hotel for 120 Euros (about US$145).**

**For the full list of hotels, their rates and contact information, visit the Congress web site, www.www.worldcongress.org click on the hotel tab and download the list of hotels.**

**Social Program Welcome Reception Thursday, 26 August 2010, 18:30–20:00**

**The amendments of advanced credentials to ICOI and DGOI members will take place fol lowing the final speaker on Friday afternoon. From 18:30 to 19:10 on Friday evening, the newest ICOI Fellows, Masters and Diplomates and DGOI Masters will be recognized in the Convention Center.**

**Harbor Party Friday, 27 August 2010, 20:00 to midnight**

There will be a dinner buffet and seating on board the Rønneboisen.**
**Industry Report**

**Precision milled, full-contour provisional restorations**

NobelProcera offers a new generation of highly esthetic provisional restorations.

- With Ivoclar Vivadent, a member of its Preferred Partner Program, NobelProcera now offers individually manufactured single crowns and bridges up to 6 units in Telio® CAD acrylic.
- The material homogeneity of Telio CAD ensures a balance between tensile strength and elasticity with high marginal stability compared with chairside temporaries. The result is a precision milled provisional available in six shades with excellent natural fluorescence and excellent surface finish for outstanding esthetics.
- With Telio CAD, NobelProcera will create a new standard for temporary restorations on natural teeth and implant abutments. Milled from a solid bloc of Telio CAD acrylic polymer crowns and bridges up to six units are designed individually using the intuitive NobelProcera Software, industrially produced at Nobel Biocare’s state-of-the-art manufacturing facilities, and delivered to the dental laboratory.

This process creates an individualized precision milled full-contour temporary solution with a high-end surface finish with exceptional strength. The restorations are subsequently polished or characterized with stains and layering materials. Telio CAD is part of Ivoclar Vivadent’s temporary solution system which includes next to the veneering materials a complete for provisional cementation and a chairside material for underlining.

**Biocompatibility and strongest temporary material**

Telio CAD by NobelProcera provides temporary restorations of exceptional fit, natural fluorescence, and optimum soft tissue support. It is easy to polish and has a high strength and stability in marginal areas. Owing to its material composition and a high-end surface finish, plaque accumulation is extremely low. Telio CAD acrylic polymer is a biocompatible material.

**Digital solutions to dental professionals and patients**

Biomet, Inc announces the collaboration of its subsidiary, Biomet 3i, an industry leader in implant dentistry, and Renishaw plc, a leading manufacturer of in-lab dental scanning systems, to offer comprehensive digital solutions to dental professionals and patients worldwide.

Building on its portfolio of Patient Specific CAD/CAM Restorative Products, Biomet 3i is expanding the boundaries of a traditional “dental implant” company by providing a series of innovative digital solutions from which laboratories, clinicians, and patients can benefit. For Renishaw, the opportunity to spread its expertise in aerospace and neurosurgery, it represents the ability to scan precision copy milled bar patterns.* Laboratories utilizing the ProceraForte® Scanner can also benefit from all of these options by using the 3i incise CAD software.

Clinicians can now offer patients 3i incise Copings and Frameworks in Zirconia and Cobalt Chrome* and precision copy milled bars*.

* 510(k) pending for precision copy milled bars as scanned on Renishaw Systems, not available in the United States.

**Ergonomical and easy to use**

Single or complete systems by Nouvag AG.

- No matter if you need a single component or complete systems, NOUVAG AG has the solution for you. From Hand pieces to complete Surgical Units. The powerful and user-friendly Motorsystem “MD30” with a frequential controlled torque system will amaze you. Just as much as the powerful Suction Pump that comes with it. The mobile Suction System “Vacuson 40” is a ready to use solution for all needs of Dental Surgery. Tri power plugs and antistatic, lockable rollers are provided on the “Sanicar” rolling frame. The combination of these features result in the ideal Surgical Unit for your doctor’s practice.
