This ADIA Symposium is aimed at providing information essential to auxiliaries working with dental implant patients. The program will evaluate the interaction of implant patients and team members and review methods the team can apply to help guide patients through implant therapy and its various components. The program will address all aspects of implantology including case presentation, answers to commonly asked questions, treatment planning, surgical, prosthetic and maintenance procedures.

Upon completion of this program participants will be able to: Develop an appreciation for the role of dental implants in the maintenance of oral health; Identify patients who would benefit from implant therapy; Discuss the consequences of non-therapy to patients; Develop a knowledge base related to treatment planning implant cases; Describe important techniques for effective case presentation; Review the techniques and skills involved in implant maintenance; Develop techniques for good intra/inter office communication and documentation; Understand the laboratory procedures involved in implant therapy; Understand the radiological importance during treatment planning.

**Swiss Quality for Dental Technology**

**Implantology, Oral Surgery**

- **MD 20**
  - Contra Angle No 5054 - 5068
  - Handpiece No 11710
  - Center Angle No 11 No 1960
  - Mucotom No 1960
  - Microcom No 1970
  - Contra Angle No 5050
  - 940.–
  - 940.–
  - 940.–

- **MD 10**
  - No 2090
  - Endo Contra Angle 8:1
  - No 2012
  - Contra Angle and one motor
  - No 1552
  - Endo Contra Angle 8:1
  - No 1534
  - Endo Contra Angle 8:1

  - 1'470.–

**Endodontia**

- **TCM Endo V**
  - Individually programmable torque controlled endodontic appliance for fast and efficient root canal preparation.
  - 2 in 1 System. Apparatus for fine canal preparation with integrated “Apex Locator”.

- **TCM Endo 20**
  - Micro motor system for Implantology applications. Suitable for operating room.
  - 3'215.–

**Dental Laboratory**

- **AF 30**
  - Precise milling machine for all kinds of occlusion, setting attachments, tapping or milling, blocking-out, drilling and milling applications.
  - 7'750.–
  - 7'750.–
  - 7'750.–

**Prosthodontic Procedures**

- Provisional prostheses & fabrication of temporary impressions; Types of superstructures; Laboratory considerations.
