Tabletop and Poster Presentations

Thursday, 26 August 2010: 18:30–20:00

Perhaps the most popular feature of our World Congress is the Tabletop and Poster Presentation competition that occurs during the Welcome Reception in the Exhibit Hall on Thursday from 18:30 to 19:30. This competition provides the perfect forum for delegates to interact with colleagues in a social, yet instructive manner. Tabletop presentations should be kept to 5–7 minutes so that the presentation can be repeated as new observers gather to review the case studies, etc. Poster presentations will be placed on bulletin boards at the start of the Congress and will remain on display throughout the Congress. Poster presentations should be at their posters to address questions during the Welcome Reception. All presentations will be judged, with the winners receiving awards and main podium consideration for future ICOI and DGOI meetings.

Welcome to the 44th Scandinavian Dental Fair
The leading annual dental fair in Scandinavia

SCANDEFA 2011

The 44th SCANDEFA invites you to exclusively meet the Scandinavian dental market and sales partners from all over the world in springtime in wonderful Copenhagen

SCANDEFA, organized by Bella Center, is being held in conjunction with the Annual Scientific Meeting, organized by the Danish Dental Association (www.tandlaegeforeningen.dk).

More than 250 exhibitors and 15,340 visitors participated at SCANDEFA 2010 on 14,220 m² of exhibition space.

Reservation of a booth
Book online at www.scandefa.dk
Sales and Project Manager, Jo Jaqueline Ogilvie
jo@bellacenter.dk, T +45 32 47 21 25

Travel information
Bella Center is located just a 10 minute taxi drive from Copenhagen Airport. A regional train runs from the airport to Osted Station, only 15 minutes drive.

Social Program

Welcome Reception
Thursday, 26 August 2010, 18:30–20:00
Plan to attend the Welcome Reception in the Exhibit Hall which follows the afternoon session on Thursday.
This party allows for the delegates and spouses to relax with drinks and hors d'oeuvres and visit with colleagues, take advantage of discounts offered by our exhibitors at their booths and to view and judge part of the tabletop/poster presentation competition

Awards Ceremony
Friday, 27 August 2010, 18:00–19:00
The awarding of advanced credentials to ICOI and DGOI members will take place following the final speaker on Friday afternoon.
From 18:30 to 19:30 on Friday evening, the newest ICOI Fellows, Masters and Diplomates and DGOI Masters will be recognized in the Convention Center.

Harbor Party
Friday, 27 August 2010, 20:00 to midnight
There will be a fantastic midnight buffet on board the Danish River Queen

Industry Report

Precision milled, full-contour provisional restorations

NobelProcera offers a new generation of highly esthetic provisional restorations.

With Ivoclar Vivadent, a member of its Preferred Partner Program, NobelProcera now offers individually manufactured single crowns and bridges up to 6 units in Telio® CAD acrylic.

The material homogeneity of Telio CAD ensures a balance between tensile strength and elasticity with high marginal stability compared with chairside temporary restorations. The result is a precision milled provisional available in six shades with excellent natural fluorescence and excellent surface finish for outstanding esthetics.

With Telio CAD, NobelProcera will create a new standard for temporary restorations on natural teeth and implant abutments. Milled from a solid block of Telio CAD acrylic polymer crowns and bridges up to six units are designed individually using the intuitive NobelProcera Software, industrially produced at Nobel Biocare’s state of the art manufacturing facilities, and delivered to the dental laboratory.

This process creates an individually milled provisional option with a high-end surface finish with exceptional strength.

The restorations are subsequently polished or characterized with finishing and layering materials. Telio CAD is part of Ivoclar Vivadent’s temporary solution system which includes the vacuum system for provisional material and a chairside material for underlining.

Biocompatibility and strongest temporary material

Telio CAD by NobelProcera provides temporary restorations of exceptional fit, natural fluorescence, and optimum soft tissue support. It is easy to polish and has a high strength and stability in marginal areas. Owing to its material composition and a high end surface finish, plaque accumulation is extremely low. Telio CAD acrylic polymer is a biocompatible material.

Digital solutions to dental professionals and patients

Biomet, Inc announces the collaboration of its subsidiary, Biomet 3i, an industry leader in implant dentistry, and Renishaw plc, a leading manufacturer of in-lab dental scanning systems, to offer comprehensive digital solutions to dental professionals and patients worldwide.

Building on its portfolio of Patient Specific CAD CAM Restorative Products, Biomet 3i is expanding the boundaries of a traditional “dental implant” company by providing a series of innovative digital solutions from which laboratories, clinicians and patients can benefit. For Renishaw.

With its 3i incise CAD software, laboratories can obtain broader access to a wide range of dental milling options, including the ability to scan precision copy milled bars. Renishaw is thrilled to be combining its innovative engineering and CAD/CAM capabilities with Biomet 3i’s renowned clinical excellence.

These digital solutions offered by Biomet 3i and Renishaw include:

- 3i incise Copings and Frameworks;
- 3i incise contact scanners;
- 3i incise CAD software; and
- Renishaw in-lab milling machines.

Using the Renishaw scanner and 3i incise CAD software, laboratories can obtain broader access to a wide range of dental milling options, including the ability to scan precision copy milled bars. Laboratories utilizing the ProconFor2 Scanner can also benefit from all of these options by using the 3i incise CAD software.

Clinicians can now offer patients 3i incise Copings and Frameworks in Zirconia and Cobalt Chrome** and precision copy milled bars. These options are patient specific and designed to result in beautifully crafted new smiles.

“We feel that this partnership will provide our mutual dental customers with unsurpassed access to the latest in digital dentistry technology”, said Maggie Anderson, President of Biomet 3i. Sir David McMurtry, Chairman and Chief Executive of Renishaw plc agreed, adding “Renishaw is thrilled to be combining its innovative engineering and CAD/CAM capabilities with Biomet 3i’s renowned clinical excellence and international sales and marketing expertise.”

Ergonomical and easy to use

Single or complete systems by Novag AG.

No matter if you need a single component or complete systems, NOVAG AG has the solution for you. From Handpieces to complete Surgical Units. The powerful and user-friendly Motorsystem “MD30” with a frequential controlled torque system will amaze you just as much as the powerful Suction Pump that comes with it. The mobile Suction System “Vacuson 40” is a ready to use solution for all needs of Dental Surgery. Tri power plugs and antistatics, lockable rollers are provided on the “Sanicure” rim frame. The combination of these features result in the ideal Surgical Unit for your doctor’s practice.
